DETAILED ACTION

Claims 1-20 are currently pending in this application. Claims 5-13, 15, 16 and 18-20 are withdrawn from further consideration by the Examiner, 37 C.F.R. § 1.142(b), as being drawn to a non-elected invention. The withdrawn subject matter is patentably distinct from the elected subject matter as it differs in structure and element and would require separate search considerations. In addition, a reference, which anticipates one group, would not render obvious the other.

Information Disclosure Statement

Applicant's Information Disclosure Statement filed on November 15, 2001, has been considered. Please refer to Applicant's copies of the 1449 submitted herewith.

Response to Restriction

Applicants' election, with traverse, of Group I, claims 1, 2-4, and 14-17 (all claims in

part) drawn to compounds of formula (I), , depicted in claim 1,

(wherein the hydrophilic moiety is polyethylene oxide chain and light fastness moiety is hydroxybenzophenones and the single compound is *poly(dimethylsiloxane-co-methyl(3-propyl(2-hydroxybenzophenone)siloxane)-graft-methoxypolyethylene glycol* (i.e. compound prepared in Example III) in response, filed November 03, 2003 is acknowledged.

The traversal is on the ground(s) that the examiner has not provided adequate reasons and or examples to support a conclusion of patentable distinctness between the identified groups.

Art Unit: 1626

This is not found persuasive because under 35 U.S.C 121, when claims involve more than one independent or distinct invention, the claims may be restricted and the examination limited to a restricted invention.

Status of the Claims

Claims 1-20 are pending in this application. Claims 5-13, 15, 16 and 18-20, as previously stated, are withdrawn from further consideration by the Examiner, 37 C.F.R. § 1.142(b), as being drawn to a non-elected invention. The withdrawn subject matter is patentably distinct from the elected subject matter as it differs in structure and element and would require separate search considerations. In addition, a reference, which anticipates one group, would not render obvious the other.

The scope of the invention of the elected subject matter is as follows:

Compounds of formula (1), depicted in claim 1,

wherein: the hydrophilic moiety is polyethylene oxide chain; light fastness moiety is hydroxybenzophenones; R_1 - R_{12} are as defined.

As a result of the election and the corresponding scope of the invention identified supra, the remaining subject matter of claims 1, 2-4, and 14-17 are withdrawn from further consideration pursuant to 37 CFR 1.142 (b) as being drawn to non-elected inventions. The withdrawn compounds contain varying functional groups such as pyridine, triazine, triazole etc, which are chemically recognized to differ in structure and function. This recognized chemical

Art Unit: 1626

diversity of the functional groups can be seen by the various classification of these functional groups in the U.S. classification system, i.e. class 544 subclass 180(+) (triazine), class 546 subclass 249(+) (pyridines), class 548 subclass 215(+) (triazoles), 548 subclass 400(+) pyrrolidines etc. Therefore the subject matter which are withdrawn from consideration as being non-elected subject differ materially in structure and composition and have been restricted properly a reference which anticipated but the elected subject matter would not even render obvious the withdrawn subject matter and the fields of search are not co-extensive.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Objections

Claims 1, 2-4, and 14-17, are objected to for containing elected and non-elected subject matter. Claims drawn solely to the elected invention as identified supra, would appear allowable.
